

Chubb safes 集寶

Europa

Grade - 2

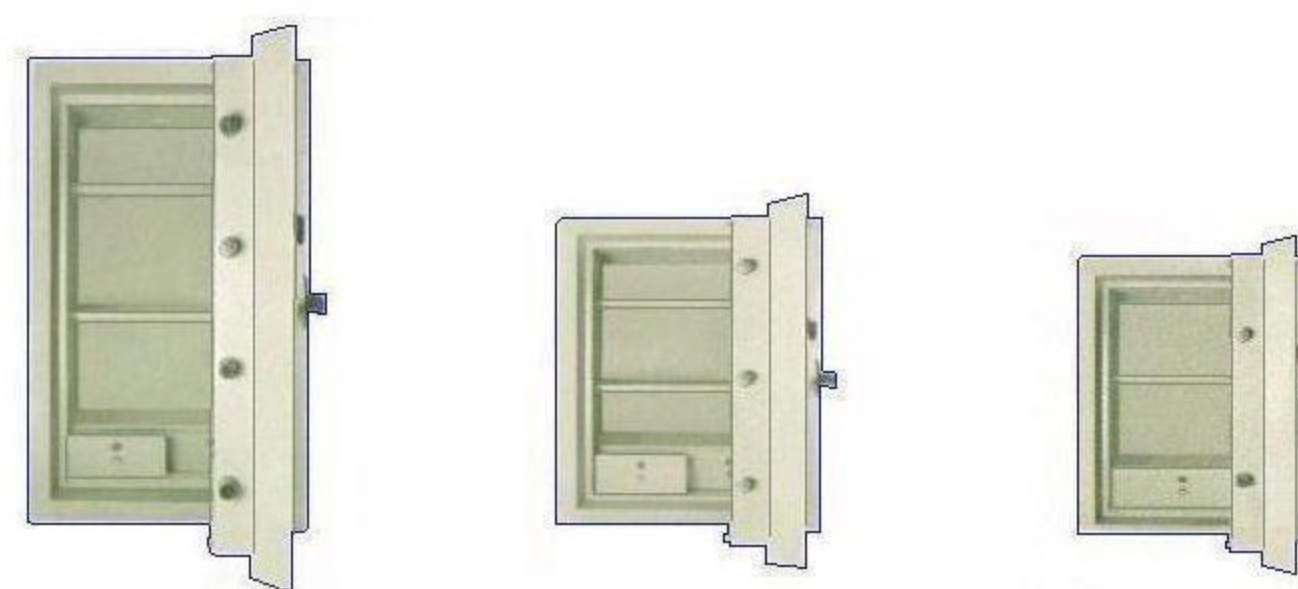

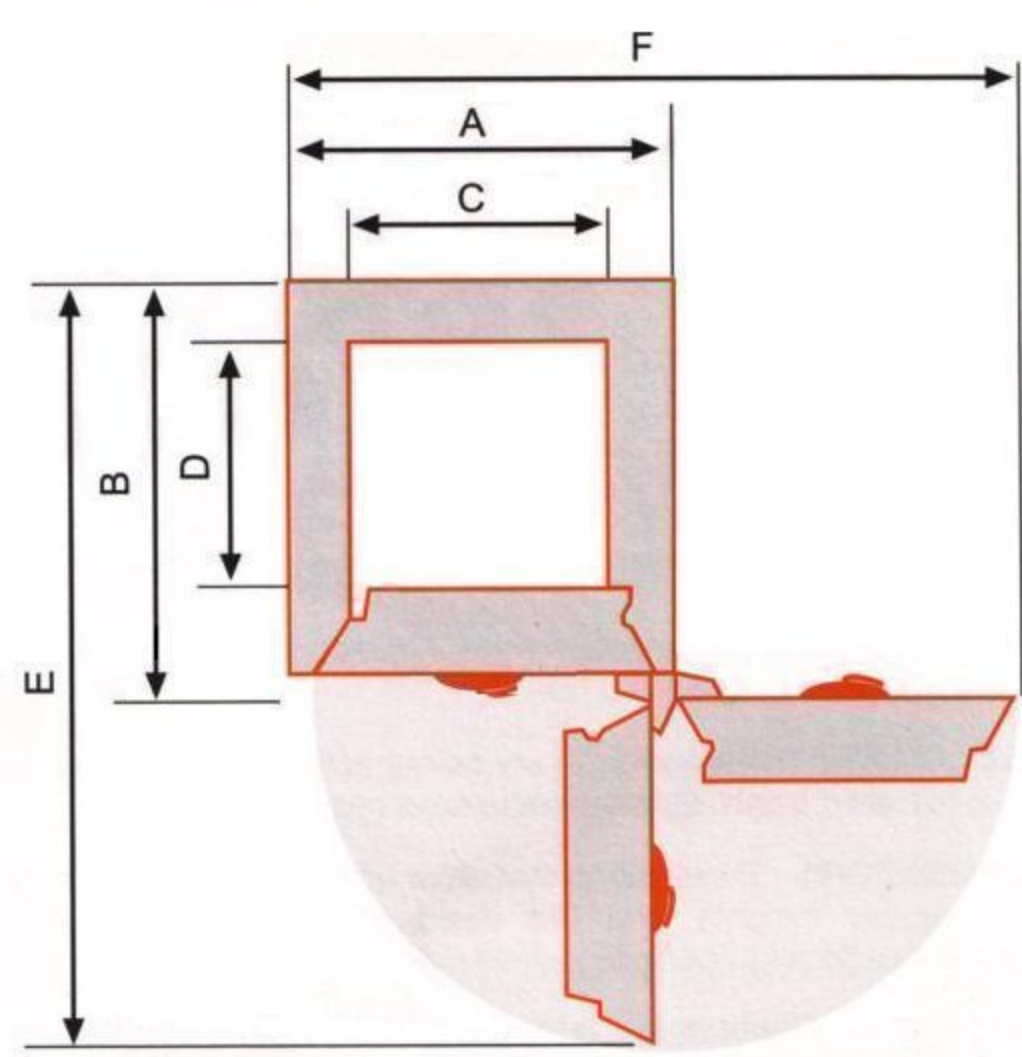

The Chubb safes Europa range has been designed to meet the most modern and exacting international standards ever adopted by Europe's leading safe testing authorities. These authorities now define the security level of a safe by allocating a grade to the model under test.

The Europa Grade-2 models come with official fire rating 60P from Swedish SP for secure combination of theft and fire protection.

The security and quality of test samples are consistently maintained during production through the operation of BS EN ISO 9001:2000 approved quality assurance system.

- **BARRIER MATERIALS** : Our research into barrier materials has provided an advanced range specially selected for the Europa. The characteristics of the material hardness, strength and resistance to cutting coupled with special construction techniques, provide effective resistance to attack in each grade.
- **LOCKS** : Key and Combination Locks are available as standard and a wide variety of electronic time and time delay locks can be fitted on special request.
- **BOLTWORK** : Three way moving boltwork provides smooth operation and effective defence against attacks on the door and surrounding frame.
- **RELOCKING DEVICES** : Three resist a wide variety of attacks aimed at the lock or boltwork.
- **FLOOR ANCHORAGE** : Provision is made for floor anchorage, to resist forced removal of the safe.
- **FINISH** : The standard body colour is RAL 9002 off white in a textured finish. Special colours on request.
- **OPTIONS** : Night Deposit / Drawer Traps and Electronic Locking

Dimension (mm)		Size:3	Size:2	Size:1
E X T E R N A L	Height	1018	718	628
	Width (A)	668	668	528
	Depth (B) Included Handle	733	733	673
I N T E R N A L	Height	850	550	460
	Width (C)	500	500	360
	Depth (D)	420	420	360
VOLUME (Litre)		179	116	60
STANDARD WEIGHT (Kg.)		710	535	390
SHELVES		2	2	1
DRAWERS	Half	○	○	×
	Full	×	×	○
